Do you need to report an accident?

The following information is important so that we can react immediately:

Who is calling?
What happened?
Where did it happen?
How many injured people?
Wait for follow-up questions.

Overview:

Emergency
Extension:  - 500
Mobile: +49 6139 89 500

Welcome
Your safety is our concern.

Rules for behavior in case of an emergency situation

Please follow the instructions of responsible personnel.

Ammonia alarm
If a continuous one minute alarm tone sounds, please stay inside the building and close the windows and doors. If you are outside, go as quickly as possible into the nearest building.

Evacuation alarm
In case of an evacuation alarm, leave the building immediately and look for the nearest assembly point. Please take note of the escape and rescue plans posted in the building.
Due to safety concerns the use of elevators is not permitted.
Safety Guidelines

Our aim is for you to feel comfortable and safe at all times. Please pay attention to the following points listed below. For any further questions, please ask your Budenheim contact person.

Escort
Please do not move about the site without an escort.

Visitor ID
You will receive an identity card after designating your Budenheim contact person at the entrance. Each ID card is intended for one visitor only and is non transferrable. The ID card shall be worn in a visible and clear way.

Safety checks
In order to guarantee the safety of all persons on-site, factory security is allowed to carry out random checks. During which all unauthorized items will be checked and stored until your visit is complete.

Environmental protection
Please use the appropriate containers for your waste. For hazardous waste, please contact the EHS (environment, health and safety) department.

Driverless Transport System (DTS)
The yellow road markings indicate the transport movements of the Driverless Transport System. The DTS drives the one-way-street in both directions and takes precedence over other vehicles and pedestrians. The sensor technology detects movements next to the DTS and automatically stops the transport system when an object gets too close. It is therefore important to keep the route free from parked objects and vehicles. In case of emergency, there are emergency stop switches around the vehicle that can be used.

Personal Protective Equipment (PPE)
There are different regulations regarding wearing PPE in specially marked work areas. For your own safety please pay attention to them.
